## Interest

Team building

Reading books

## Objective

I am web developer specializing in the MERN stack, seeking to leverage my skills in building dynamic and user-friendly applications. Committed to delivering high-quality solutions and continuously learning to stay updated with industry trends. I am also excited to collaborate with clients to turn their ideas into reality and contribute to impactful projects.

## Education

Diploma in ICT

2024

Unique Academy

4.3

## Project

### Doctor Appointment Booking System

Developed a comprehensive Doctor Appointment Booking System that allows users to easily schedule appointments with healthcare professionals and securely process payments. The application features a user-friendly interface for both patients and doctors, enhancing the overall healthcare experience. Technologies Used: MongoDB, Express.js, React, Node.js, Stripe API for payment processing. Live site: <https://medicare-bjgc.onrender.com/>

### Tourism Booking System

Developed a user-friendly Tourism Booking System that enables tourists to browse and book various tours without the need for online payment integration. The application provides detailed information about each tour, including itineraries, locations, and pricing, making it easy for users to plan their trips. Technologies Used: MongoDB, Express.js, React, Node.js. Bootstrap, etc Live site: <https://travel-world-wo14.onrender.com/>

### Accommodation Booking System

Developed an Accommodation Booking System that allows users to browse and book various places for their stay. The application provides detailed information about each accommodation option, including amenities, availability, and pricing, enabling users to make informed decisions about their travel plans. Technologies Used: MongoDB, Express.js, React, Node.js. SASS, Material UI Live site: <https://dream-nest-zpmr.onrender.com/>

### Buy and Rent Places Platform

Developed a platform that allows users to buy and rent various properties, facilitating connections between property owners and potential buyers or renters. The application provides comprehensive listings with detailed descriptions, images, and contact information, enabling users to make informed

## Additional

---

As a web developer, I have gained proficiency in the MERN stack (MongoDB, Express.js, React, Node.js) through hands-on projects. I have successfully developed applications such as a Doctor Appointment Booking System and a Tourism Booking Platform, showcasing my ability to create user-friendly interfaces and manage backend functionalities. My technical skills include HTML, CSS, JavaScript, and RESTful APIs, complemented by strong problem-solving abilities. Fluent in both English, Swahili and Arabic, I am committed to continuous learning and actively seek opportunities to enhance my skills within the web development community.
